

Current sharing module

Patent Protection RoHS

FEATURES

- Maximum current automatic current sharing mode
- Wide input voltage range: 12-54V
- High current sharing accuracy
- 100% domestic components
- Operating ambient temperature range: -40°C to +105°C

The FB-1254YMDG is specially designed for applications that require multi-module redundant current sharing in power systems. When a single power supply fails, it can be automatically disconnected without affecting the work of other modules, this product is suitable for occasions of redundant applications, parallel power-up, etc.

Note: The maximum current automatic current sharing mode means that among n parallel modules, the module with the largest output current will automatically become the master module, and the other modules are slave modules. Their error voltages are set in turn to correct the uneven distribution of load current.

Selection Guide

| Certification | Part No. | Input Voltage (VDC) | | Current accuracy(%) | Voltage accuracy(%) | | Min. parallelable number |
|---------------|-------------|---------------------|-------------------|---------------------|---------------------|---------------------|--------------------------|
| | | Nominal (Range) | Max. ^① | Full load | Output voltage <24V | Output voltage ≥24V | |
| -- | FB-1254YMDG | 48 (12-54) | 64 | ±5 | ±8 | ±5 | 4 |

Notes:

①Exceeding the maximum input voltage may cause permanent damage.

Input Specifications

Absolute Maximum Ratings

| Pin | Functions | Description | Min. | Typ. | Max. | Unit |
|-----|-----------|--|------|------|------|------|
| 1 | +Vo | Converter positive output | -0.3 | -- | 64 | VDC |
| 2 | SENSE+ | Output voltage remote compensation positive terminal | -- | -- | +Vo | |
| 3 | SENSE- | Output voltage remote compensation negative terminal | -- | 0 | -- | |
| 4,5 | VCS+,VCS- | Current sampling signal | -0.3 | -- | 12 | |
| 6 | LS | Load sharing bus | -0.3 | -- | 12 | |

Recommended Operating Conditions

| Pin | Functions | Description | Min. | Typ. | Max. | Unit |
|-----|-----------|---------------------------|------|------|------|------|
| 1 | +Vo | Converter positive output | 12 | -- | 54 | VDC |
| 4,5 | VCS+,VCS- | Current sampling signal | 0.05 | -- | 0.45 | |

General Specifications

| Item | Operating Conditions | Min. | Typ. | Max. | Unit |
|--------------------------|----------------------|---------------------------------|------|------|------|
| Operating Temperature | / | -40 | -- | +105 | °C |
| Storage Temperature | / | -40 | -- | +125 | |
| Storage Humidity | Non-condensing | 10 | -- | 95 | %RH |
| Cooling Test | / | Free air convection (20LFM) | | | |
| Shock and Vibration Test | / | IEC/EN61373-Category 1, Grade B | | | |

Mechanical Specifications

| | |
|----------------|--------------------------|
| Case Material | Aluminum alloy |
| Dimensions | 25.40 x 25.40 x 11.70 mm |
| Weight | 9.3g (Typ.) |
| Cooling Method | Free air convection |

Electromagnetic Compatibility (EMC)

| Immunity | Test Method | Standard | Level | Criteria |
|----------|-------------|-----------------|-----------------------|------------------|
| | ESD | IEC/EN61000-4-2 | Contact ±4KV Air ±6KV | perf. Criteria A |
| | RS | IEC/EN61000-4-3 | 20V/m | perf. Criteria A |
| | EFT | IEC/EN61000-4-4 | ±2KV | perf. Criteria A |
| | CS | IEC/EN61000-4-6 | 10 Vr.m.s | perf. Criteria A |

Note: In addition to ESD, other tests shall be conducted in cooperation with the supporting test module and the periphery of the supporting test module.

Design Reference

1. Typical application

Fig. 1 is a typical application wiring diagram.

Fig. 2 shows the application wiring diagram of the module in the 48V 8.3A 400W actual parallel current sharing circuit, in which recommended peripheral device parameters are table 1.

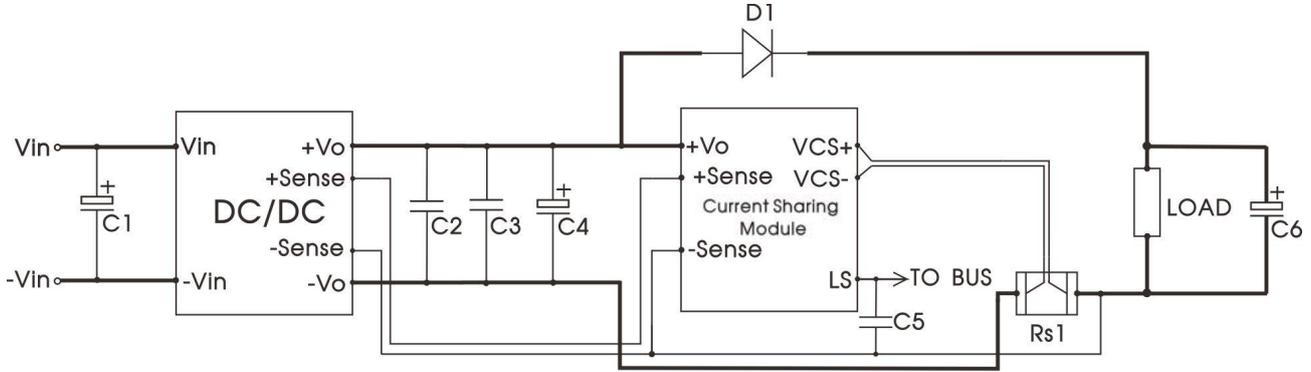

Fig. 1

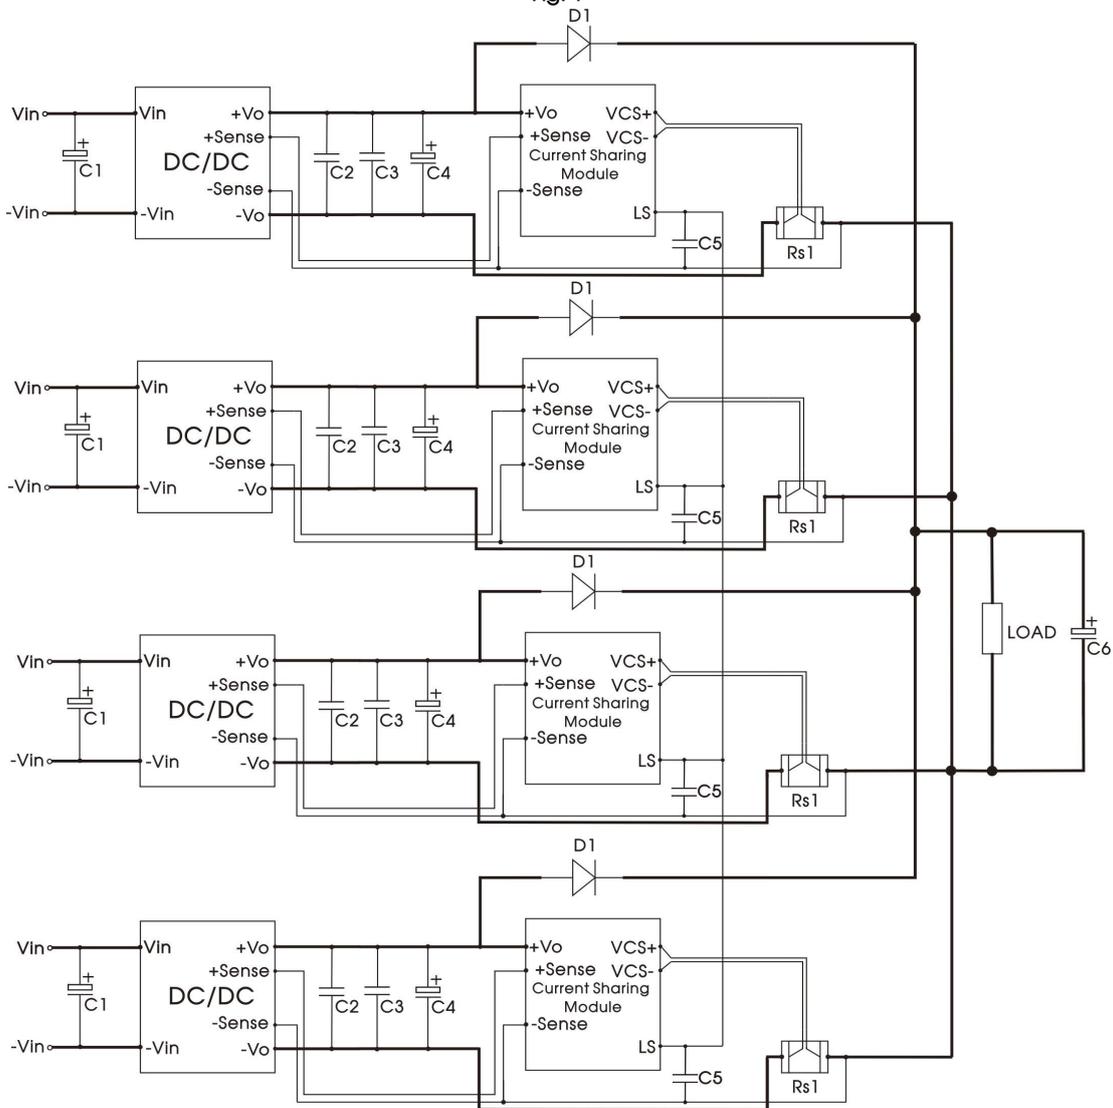

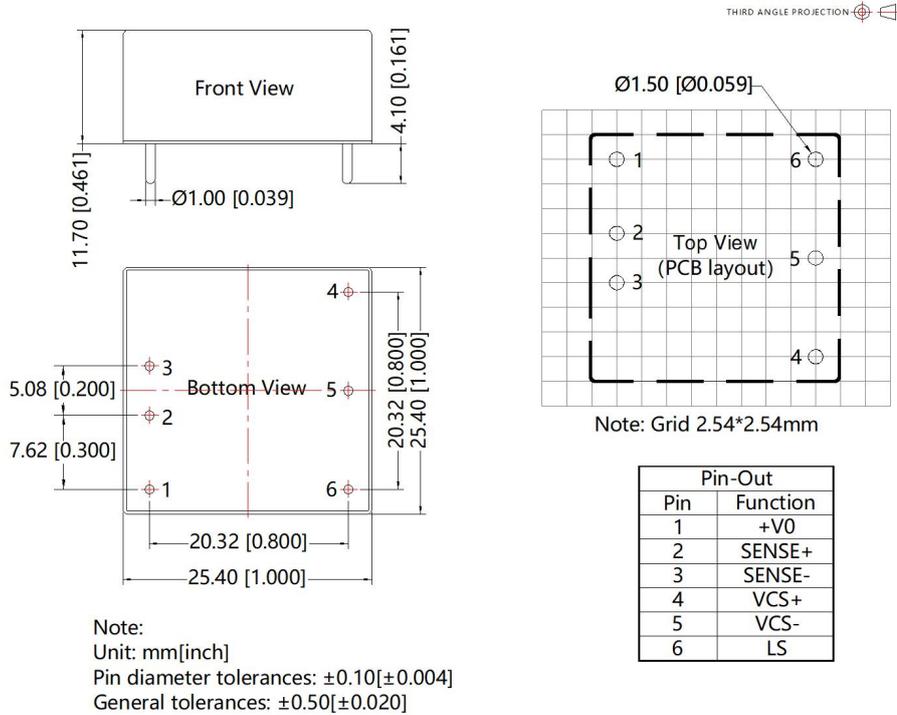

Fig. 2

Table 1: recommended component parameter

| Components | Specification | Description |
|---------------------|---------------|---|
| C1A/C1B/C1C/C1D | 100uF | 250V |
| C2A/C2B/C3C/C4D | 1uF | 100V |
| C3A/C3B/C3C/C3D | 10uF | 63V |
| C4A/C4B/C4C/C4D | 220uF | 63V |
| C5A/C5B/C5C/C5D | 1nF | 25V |
| D1A/D1B/D1C/D1D | (60V 15A)●4 | 4 in parallel (consider heat dissipation) |
| Rs1A/Rs1B/Rs1C/Rs1D | 10mΩ (±1%) | 2W/2512 |
| C6 | 330uF | 63V |

Note : The route of the bold part in the note diagram shall be as short and wide as possible

Dimensions and Recommended Layout

Notes:

1. For additional information on Product Packaging please refer to www.mornsun-power.com. Horizontal Packaging Bag Number : 58210003;
2. Unless otherwise specified, parameters in this datasheet were measured under the conditions of $T_a=25^{\circ}\text{C}$, humidity<75%RH with nominal input voltage and rated output load;
3. All index testing methods in this datasheet are based on company corporate standards;
4. We can provide product customization service, please contact our technicians directly for specific information;
5. Products are related to laws and regulations: see "Features" and "EMC";
6. Our products shall be classified according to ISO14001 and related environmental laws and regulations, and shall be handled by qualified units.
