EMC Filter

FC-A01D & FC-B01D Series

EMC Filter

FEATURES

- Compact size, high isolation
- High efficiency up to 97%
- EMC filters provide compliance with requirements of IEC/EN61000-4 and CISPR32/ EN55032 when used in combination with power converter modules
- Cost-effective

These filter modules are extremely useful in noise-sensitive analog circuit applications. For compliance with IEC/EN61000-4-5 with surge levels of $\pm 2kV$ (2Ω source resistance)/ $\pm 4kV$ (12Ω source resistance) use FC-A01D & FC-B01D on the input side of DC/DC converter module to ensure the module is protected from surges. In addition it ensures that the EMI noise levels meet the requirement of CISPR32 /EN55032 Class B.

With EMC filter used to protect MORNSUN DC-DC converter modules, the system's max. input voltage and input current **must not exceed** the EMC filter's maximum Voltage and/or nominal current specifications.
