FEATURES

- Input voltage range: 320 - 528VAC or 450 - 750VDC
- Operating ambient temperature range: -40°C to +85°C
- High efficiency, high reliability
- 1U height shape
- LED indicate the power on
- Operating altitude up to 5000m
- Output short circuit, over-current, over-voltage protection
- Safety according to UL/IEC/EN62368, GB4943
- 3 years warranty

LM100-26B24 is the ultra-small Mornsun second-generation new industrial standard enclosed power supply, which has innovated the industrial power supply standard from the aspect of dimension, performance, technology and structure. It features universal AC input and at the same time accepts DC input voltage, cost-effective, low no load power consumption, high efficiency, high reliability and double or reinforced isolation. The converter offer excellent EMC performance and meet UL/IEC/EN62368, GB4943 standards and it is widely used in areas of industrial, LED, street light control, security, telecommunications, smart home, etc.

Selection Guide

Part No.	Output Power (W)	Nominal Output Voltage and Current (Vo/Io)	Output Voltage Adjustable Range (V)	Efficiency at 0VAC (%) Typ.	Capacitive Load (uF) Max.
LM100-26B24	100	24V/4.2A	22.8-27.6	88	2200

Note:
 1. The product picture is for reference only. For details, please refer to the actual product.
 2. Under any conditions, the total power of the product should not exceed the rated power. When the output voltage is increased, the total output power cannot exceed the rated output power, when the output voltage is decreased, the output current cannot exceed the rated output current.

Note:

- For additional information on Product Packaging please refer to www.mornsun-power.com. Packaging bag number: 58220723;
- Unless otherwise specified, parameters in this datasheet were measured under the conditions of Ta=25°C, humidity <75%RH with nominal input voltage and rated output load;
- The room temperature derating of 5°C/1000m is needed for operating altitude greater than 2000m;
- All index testing methods in this datasheet are based on our company corporate standards;
- In order to improve the efficiency at high input voltage, there will be audible noise generated, but it does not affect product performance and reliability;
- We can provide product customization service, please contact our technicians directly for specific information;
- Products are related to laws and regulations: see "Features" and "EMC";
- The out case needs to be connected to PE () of system when the terminal equipment in operating;
- The output voltage can be adjusted by the ADJ, clockwise to increase;
- Our products shall be classified according to ISO14001 and related environmental laws and regulations, and shall be handled by qualified units;
- The power supply is considered a component which will be installed into a terminal equipment. All EMC tests should be confirmed with the final equipment. Please consult our FAE for EMC test operation instructions.
