LM1000-20Bxx (-QQ) Series

### **FEATURES**

- Universal 90 264VAC or 130 390VDC Input voltage
- Operating ambient temperature range: -30°C to +70°C (-40°C start-up available)
- High I/O isolation test voltage up to 4000VAC
- High efficiency up to 92%
- Output short circuit/over-current/over-voltage, over-temperature protection
- Operating altitude up to 5000m
- LED indicate the power on
- 3 years warranty

LM1000-20Bxx series is one of Mornsun's enclosed AC-DC switching power supply. They feature universal AC input and at the same time accepts DC input voltage, cost-effective, high efficiency, high reliability and reinforced insulation. These converters offer excellent EMC performance and meet UL/IEC/EN62368, GB4943 standards and they are widely used in areas of industrial.

Note:

1. Use suffix "QQ" for both sides conformal coating;

2. The product picture is for reference only. For details, please refer to the actual product.

3. \*Under any conditions, the total power of the product should not exceed the rated power. When the output voltage is increased, the total output power cannot exceed the rated output power, when the output voltage is decreased, the output current cannot exceed the rated output current.

|                                     | Short interruptions* | IEC61000-6-2/IEC61 | 000-4-11                                      | 0% Un, 250/300 cycle(50/60Hz)  | perf. Criteria C |  |  |

Note: 1. perf. Criteria:

A: The equipment shall continue to operate as intended without operator intervention;

B: After the test, the equipment shall continue to operate as intended without operator intervention;

C: Loss of function is allowed, provided the function is self-recoverable, or can be restored by the operation of the controls by the user in accordance with

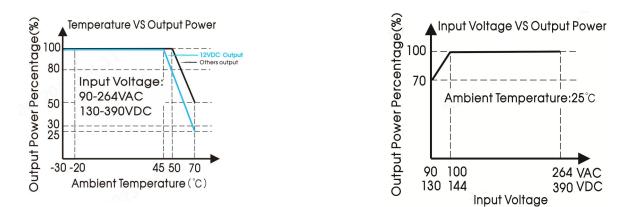

the manufacturer's instructions. Functions and (or) information stored in non-volatile memory or protected by backup batteries should not be lost. 2. \*Un is the maximum input nominal voltage.

#### Product Characteristic Curve

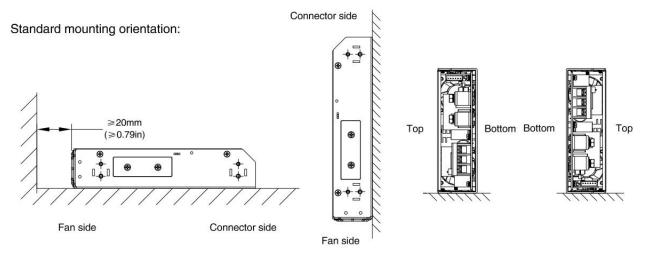

Note: 1. With an AC input voltage between 90 -100VAC and a DC input between 130-144VDC the output power must be derated as per the temperature derating curves:

2. This product is suitable for applications using forced air cooling; for applications in closed environment please consult Mornsun FAE.

#### Installation Diagram

#### Installation Method

Note: The fan panel cannot be blocked by other objects, and a distance of at least 20mm must be maintained, otherwise it will affect the heat dissipation and performance of the power module.

### LM1000-20Bxx (-QQ) Series

#### Dimensions and Recommended Layout

Note:

Unit: mm[inch] General tolerances: ±1.00[±0.039] LED: Output status indicator LED

#### Note:

- For additional information on Product Packaging please refer to www.mornsun-power.com. Packaging bag number: 58220175; 1.
- Unless otherwise specified, parameters in this datasheet were measured under the conditions of Ta=25°C, humidity <75%RH with 2. nominal input voltage and rated output load;
- The room temperature derating of  $5^{\circ}$ C/1000m is needed for operating altitude greater than 2000m; 3.
- All index testing methods in this datasheet are based on our company corporate standards; 4.
- 5. In order to improve the efficiency at high input voltage, there will be audible noise generated, but it does not affect product performance and reliability;
- We can provide product customization service, please contact our technicians directly for specific information; 6.
- Products are related to laws and regulations: see "Features" and "EMC"; 7.
- The out case needs to be connected to PE  $(\textcircled{\pm})$  of system when the terminal equipment in operating; 8.
- The output voltage can be adjusted by the ADJ, clockwise to increase; 9.
- Our products shall be classified according to ISO14001 and related environmental laws and regulations, and shall be handled by 10. aualified units:
- The power supply is considered a component which will be installed into a terminal equipment. All EMC tests should be confirmed with 11. the final equipment. Please consult our FAE for EMC test operation instructions.
