## **MORNSUN<sup>®</sup>**

#### 15W, AC/DC Converter

### FEATURES

- Wide 85 305V universal AC or 100 430VDC input voltage
- Regulated output, high efficiency
- Output short circuit, over-current, over-voltage protection
- Safety Class: CLASS I
- Special designed for power systems

LO15-23D0524-02E is one of Mornsun's dedicated power converter for power systems. It features universal AC input and at the same time accepts DC input voltage, high efficiency, high reliability, reinforced isolation. It offers good EMC performance compliant to UL/EN/IEC62368 standards, Surge performance to meet the 4 level standards standards. For extremely harsh EMC environment, we recommend using the application circuit show in Design Reference of this datasheet.

RoHS

#### Efficiency Vs Output Load(Vin=230VAC)

#### Design Reference

#### 1. Typical application circuit

| Model            | C2(µF) | C4(µF) | TVS1     | TVS2    |
|------------------|--------|--------|----------|---------|
| LO15-23D0524-02E | 10     | 10     | SMBJ7.0A | SMBJ30A |

#### Output Filter Components:

We recommend using an electrolytic capacitor with high frequency, and low ESR rating for C2, C4 (refer to manufacture's datasheet). Choose a capacitor voltage rating with at least 20% margin, in other words not exceeding 80%. C1, C3 are ceramic capacitors used for filtering high-frequency noise, recommended to use 1µF. TVS1/TVS2 are recommended component to protect post-circuits if converter fails.

#### 2. EMC compliance recommended circuit

#### Fig. 2 (Output external circuit refer to the typical application circuit)

| CY1, CY2                                       | 1nF/400VAC                   |  |  |  |  |  |
| FUSE   | 2A/300V, slow-blow, required |  |  |  |  |  |
| We recommend using part no. FC-L01D2 (MORNSUN) |                              |  |  |  |  |  |

3. For additional information please refer to application notes on www.mornsun-power.com.

#### Dimensions and Recommended Layout

#### THIRD ANGLE PROJECTION

| Pin-Out |          |                   |                   |  |  |  |
|---------|----------|-------------------|-------------------|--|--|--|
| Pin     | Function | Connector         | Terminal          |  |  |  |
| 1       | PE       | VH-5A             | VH-5Y             |  |  |  |
| 2       | AC(N)    | or B3P5-VH        | or VHR-5N         |  |  |  |
| 3       | AC(L)    | or the same spec. | or the same spec  |  |  |  |
| 4       | -VO2     |                   |                   |  |  |  |
| 5       | +VO2     | VH-4A             | VH-4Y             |  |  |  |
| 6       | -V01     | or the same Spec. | or the same Spec. |  |  |  |
| 7       | +V01     |                   |                   |  |  |  |

Note: Unit: mm[inch] In CN1 model: VH-5A, Recommend terminal: VH-5Y Out CN2 model: VH-4A, Recommend terminal: VH-4Y Mounting hole screwing torque: Max 0.4 N·m General tolerances: ±0.50[±0.020] The layout of the device is for reference only , please refer to the actual product

#### Notes:

- 1. For additional information on Product Packaging please refer to <u>www.mornsun-power.com</u>. Packaging bag number: 58220019;
- If the product is not operated within the required load range, the product performance cannot be guaranteed to comply with all parameters in the datasheet;
- 3. The maximum capacitive load offered were tested at input voltage range and full load;
- 4. Unless otherwise specified, parameters in this datasheet were measured under the conditions of Ta=25°C, humidity<75% with nominal input voltage and rated output load;
- 5. All index testing methods in this datasheet are based on our company corporate standards;
- 6. We can provide product customization service, please contact our technicians directly for specific information;
- 7. Specifications are subject to change without prior notice.
