30W, AC-DC converter

C E Report

UK

RoHS

FEATURES

- Universal 85-264VAC or 100-370VDC input voltage
- 3×2 inch high power density
- ullet Operating ambient temperature range: -25°C to +70°C
- Output short circuit, over-current, over-voltage protection
- High efficiency, high reliability
- Regulated output, low output ripple & noise
- EMI performance meets CISPR32 / EN55032 CLASS B
- 2 years warranty
- Safety according to UL/IEC62368, UL/EN60335

LO30-10A/Dxx series is one of Mornsun's compact size power converter. It features universal AC input and at the same time accepts DC input voltage, low power consumption, high efficiency, high reliability, reinforced isolation. It offers good EMC performance compliant to IEC/EN61000-4, CISPR32/EN55032, UL/EN60335 and meets UL/EN/IEC62368 standards. The converters are widely used in industrial, office and civil applications. For extremely harsh EMC environment, we recommend using the application circuit show in Design Reference of this datasheet.

Selection Guide

Product Characteristic Curve

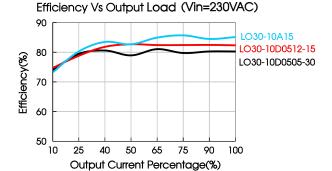

Note: ① With an AC input between 85-140VAC and a DC input between 100-200VDC, the output power must be derated as per temperature derating curves; ② This product is suitable for applications using natural air cooling; for applications in closed environment please consult factory or one of our FAE.

Output Filter Components:

We recommend using an electrolytic capacitor with high frequency, and low ESR rating for C2, C4 (refer to manufacture's datasheet). C1, C3 are ceramic capacitors used for filtering high-frequency noise. Choose a capacitor voltage rating with at least 20% margin, in other words not exceeding 80%. And TVS is a recommended suppressor diode to protect the application in case of a converter failure.

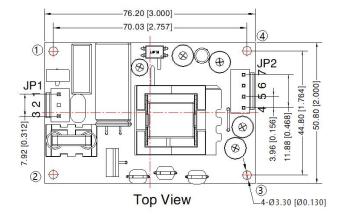

2. For additional information please refer to application notes on www.mornsun-power.com.
