AC/DC 350W Enclosed Switching Power Supply LOF350-20Bxx-C-CZ Series MORNSUN®

FEATURES

- Universal 90 264VAC or 127 370VDC input voltage
- Accepts AC or DC input (dual-use of same terminal)
- Operating ambient temperature range: -40°C to +70°C
- Built-in active PFC function
- High I/O isolation test voltage up to 4000VAC
- Extremely low leakage current < 0.1mA</p>
- Stand-by power consumption < 1.0W</p>
- The base plate with conformal coating
- Output short circuit, over-current, over-voltage protection, over-temperature protection
- Installing in system of Safety Class I (with PE), Class II (no PE) is available
- Suitable for BF application
- Operating altitude up to 5000m
- 5 years warranty

LOF350-20Bxx-C-CZ series is one of Mornsun's enclosed AC-DC switching power supply and suitable for all kinds of BF type (be accessible to patients) medical system equipment. It features universal AC input and at the same time accepts DC input voltage, cost-effective, low no load power consumption, high efficiency, high reliability and double or reinforced insulation. These converters offer excellent EMC performance and meet IEC/EN/UL62368, GB4943, IEC/EN60335, IEC/EN61558, IEC/EN/ES60601 standards and they are widely used in areas of industrial, LED, street light control, electricity, security, telecommunications, smart home, etc.

Notes: 1. *Under any conditions, the total power of the product should not exceed the rated power. When the output voltage is increased, the total output power cannot exceed the rated output power, when the output voltage is decreased, the output current cannot exceed the rated output current; 2. *When measuring the full load efficiency, the fan should be connected to an external power supply. Fan loss is not included in the input power; 3. *LOF Products with shell is also available, named LOF350-20Bxx-CZ.

AC/DC 350W Enclosed Switching Power Supply LOF350-20Bxx-C-CZ Series

2. *The "Tip and barrel method" is used for ripple and noise test, output parallel 10uF electrolytic capacitor and 0.1uF ceramic capacitor, please refer to AC-DC Converter Application Notes for specific information;

3. *When the product works under light load (<10%lo), in order to improve efficiency, the value of ripple & noise will be 1.5 times of the full load specification;

4. "For all the above test items, please refer to our company standard "AC-DC Black Box Test Specification" for specific test specifications and methods;

5. *For fan power connection method, please refer to pin 6/7 of the dimension drawing.

Dimensions and Recommended Layout

THIRD ANGLE PROJECTION

Note:

- 1. For additional information on Product Packaging please refer to www.mornsun-power.com. Packaging bag number: 58220154;
- 2. Unless otherwise specified, parameters in this datasheet were measured under the conditions of Ta=25°C, humidity<75%RH with nominal input voltage and rated output load;
- 3. The ambient temperature derating of 5°C/1000m is needed for operating altitude greater than 2000m;
- 4. All index testing methods in this datasheet are based on our company corporate standards;
- 5. In order to improve the efficiency at light load, there will be audible noise generated, but it does not affect product performance and reliability;
- 6. We can provide product customization service, please contact our technicians directly for specific information;
- 7. Products are related to laws and regulations: see "Features" and "EMC";
- 8. The out case needs to be connected to PE () of system when the terminal equipment in operating;
- 9. Our products shall be classified according to ISO14001 and related environmental laws and regulations, and shall be handled by qualified units;
- 10. Warning: Use double fuses, please disconnect the power before maintenance and replacement;
- 11. The power supply is considered a component which will be installed into a final equipment. All EMC tests should be confirmed with the final equipment. Please consult our FAE for EMC test operation instructions.
