

Single high speed RS485 isolation transceiver module(enhanced version)

FEATURES

- Integrated high efficiency isolated DC/DC converter
- Two- port isolation (3.0kVDC)
- Operating temperature range: -40°C to +85°C
- High baud rate up to 500kbps
- The bus is able to support 256 nodes at maximum
- Set isolation and ESD bus protection(Contact ±4kV /Air ±8kV, Perf. Criteria B)
- IEC60950, UL60950, EN60950 approval

TD301D485H-E / TD501D485H-E, the main function is to convert the logic level to the RS485 protocol differential level, to achieve signal isolation; is a IC integrated technology to achieve the power isolation, signal isolation, RS485 communication and bus protection in the One of the RS485 protocol transceiver module. The product comes with constant pressure isolation power supply, can achieve 3000VDC electrical isolation. Products can be easily embedded in the user equipment, so that equipment can easily achieve RS485 protocol network connection.

Selection Guide

Certification	Part No.	Power input (VDC)	Baud rate (kbps)	Static Current (mA)	Max. Operating Current (mA)	Number of Nodes
UL/CE/CB	TD301D485H-E	3.15-3.45	500	35	130	256
	TD501D485H-E	4.75-5.25	500	35	130	256

Limit Specifications

Item	Operating Conditions	Min.	Typ.	Max.	Unit
Input Surge Voltage (1sec.max.)	3.3V series	-0.7	--	5	VDC
	5.0V series	-0.7	--	7	
Pin Welding Resistance Temperature	Welding time: 10s (Max.)	--	--	300	°C

Input Specifications(3.3V series)

Item	Symbol	Min.	Typ.	Max.	Unit
Power Supply Input Voltage	VCC	3.15	3.3	3.45	VDC
TXD Logic Level	High-level	V_{IH}	3.3	$V_{CC}+0.5$	
	Low-level	V_{IL}	--	0.8	
RXD Logic Level	High-level	V_{OH}	$V_{CC}-0.2$	--	
	Low-level	V_{OL}	0.2	0.4	
TXD Drive Current	I_T	--	--	2	mA
CON Drive Current	I_{CON}	--	--	5	
RXD Output Current	I_R	--	--	10	
Serial Interface	Compatible with + 3.3 V UART interface only				

Input Specifications(5.0V series)

Item	Symbol	Min.	Typ.	Max.	Unit
Power Supply Input Voltage	VCC	4.75	5	5.25	VDC
TXD Logic Level	High-level	V_{IH}	5	$V_{CC}+0.5$	
	Low-level	V_{IL}	--	0.8	
RXD Logic Level	High-level	V_{OH}	$V_{CC}-0.2$	--	
	Low-level	V_{OL}	0.2	0.4	
TXD Drive Current	I_T	--	--	2	mA
CON Drive Current	I_{CON}	--	--	5	
RXD Output Current	I_R	--	--	10	
Serial Interface	Compatible with + 5 V UART interface only				

Transmission Specifications

Item	Symbol	Min.	Typ.	Max.	Unit
Data Delay	TXD Transmit Delay	t_r	--	110	ns
	RXD Receive Delay	t_r	--	110	
Rise delay and drop delay of bus output		--	--	100	
Handoff Delay		--	--	30	us

Output Specifications

Item	Symbol	Min.	Typ.	Max.	Unit
Difference Level	$V_{diff(c)}, R_L=54\ \Omega$	1.5	2	3	VDC
Difference load resistance		54	60	--	Ω
Difference Input Impedance	$-7V \leq V_{CM} \leq +12V$	96	--	--	k Ω
Built-in pull-down resistor		--	120	--	
Bus Interface Protection		ESD protection, driver short circuit protection, bus failure protection			

Truth Table Specifications

Transceiver Control	Input		Output		
	CON	TXD	A	B	RXD
Send status	0	1	1	0	1
	0	0	0	1	1
Receive status ^①	CON	V_A-V_B	RXD		
	1	$\geq -10mV$	1		
	1	$\leq -200mV$	0		
	1	$-200mV < V_A-V_B < -10mV$	Uncertain state		

Note: ① Receiving threshold varies with V_{CC} will produce subtle error.

General Specifications

Item	Operating Conditions	Value
Isolation Voltage	Testing for 1 minute, leakage current <1mA	3000VDC
Insulation Resistance	Isolation voltage 500VDC	1000M Ω (Input-output)
Operating Temperature		-40 $^{\circ}C$ to +85 $^{\circ}C$
Transportation and Storage Temperature		-50 $^{\circ}C$ to +105 $^{\circ}C$
Operating Humidity	Non-condensing	5% - 95%
Safety Standard		IEC60950/EN60950/UL60950
Safety Certification		
Safety Class		CLASS III

Physical Specifications

Dimensions	DIP10
Weight	4g(Typ.)
Cooling Method	Free air convection

EMC Specifications

EMI	CE	CISPR32/EN55032	CLASS B (see Fig. 3)
EMS	ESD	IEC/EN 61000-4-2	Contact $\pm 4kV$ / Air $\pm 8kV$ (Bare component, A, B port) Perf. Criteria B
	EFT	IEC/EN 61000-4-4	$\pm 2kV$ (Bare component, A, B port) Perf. Criteria B
	Surge	IEC/EN 61000-4-5	$\pm 2kV$ (Bare component, A, B port) Perf. Criteria B
	CS	IEC/EN 61000-4-6	3Vr.m.s (Bare component) Perf. Criteria A

Application Precautions

1. Please read the instructions carefully before use; contact our technical support if you have any problem;
2. Do not use the product in hazardous areas;
3. Use DC power supply for the product and 220V AC power supply is prohibited;
4. Do not dismount and assemble the product without permission to avoid failure or malfunction of equipment;

After-sales service

1. Ex-factory inspection and quality control have been strictly conducted for the product; if there occurs abnormal operation or possibility of failure of internal module, please contact the local representative or our technical support;
2. The warranty period for the product is 3 years as calculated from the date of delivery. If any quality problem occurs under normal use within the warranty period, the product can be repaired or changed for free.

Applied circuit

Refer to the RS485 Industrial Bus Interface Isolating Module Application Manual.

Design Reference

1. Typical application circuit

Fig.1

As shown in Figure 1, TD5 (3) 01D485H-E isolated transceiver module typical connection circuit, which TD501D485H-E module must use 5V power supply, the module TXD, RXD and CON pin interface matching level of 5V, does not support 3.3V system level, TD301D485H-E module must use 3.3V power supply, the module TXD, RXD and CON pin interface matching level of 3.3V, does not support 5V system level.

2. Recommended port protection circuit

Fig.2

Notes: Twisted pair shield grounded reliably.

Parameter declaration:

Components	Recommended parameters	Components	Recommended parameters
R1	120Ω	R2	1MΩ
C1	102,2kV	D1	SMBJ12CA
T1	ACM2520-301-2P	D2、D3	SMBJ6.5CA
GDT	S30-A90X		

As the module internal A / B line comes with ESD protection, so users generally apply to the environment in good circumstances without additional ESD protection devices, as shown in Figure 1, the typical connection circuit. But if the application environment is relatively poor (such as high voltage power, lightning and other environments), it is recommended that users must be in the module A / B line side plus TVS tube, common mode inductors, Gas discharge tube, shielded twisted pair or the same network single point Earth and other protective measures. Therefore, the recommended application circuit shown in Figure 2, the recommended parameters as shown in the table. Recommended circuit diagram and parameter values for reference only, according to the actual situation to determine whether the need for circuit diagram of the device and the appropriate parameter values.

Components	Recommended parameters
C1 C2	1uF/16V
LDM	CD43-12uH

Fig.3

3. Precautions

- Hot swapping is not supported.
- TD501D485H-E is not compatible with 3.3V TTL level; TD301D485H-E is not compatible with 5V TTL level
- Module 6 feet and 7 feet are not drawn, this pin is left when the pin 10 is not used.
- Data transmission line, please use shielded twisted pair, the same network of shielding the single point of the earth.
- From the truth table characteristics can be seen, The series of embedded isolated RS-485 transceiver module is in the CON pin is low to send data, CON pin is high when receiving data, and the general 485 transceiver chip transceiver control level is the opposite. Therefore, if the customer wants to change with the ordinary 485 transceiver chip transceiver control level is the same, Then recommend the customer in the MCU and CON feet between a transistor reverse circuit.
- From the truth table characteristics, the series of embedded isolated RS-485 transceiver module when the A / B line differential voltage greater than or equal to -10mV, the module receiving level is high; when the A / B line differential voltage is less than or equal to -200mV , The module receiving level is low; when the A / B line differential voltage is greater than -200mV and less than -10mV, the module receiving level is uncertain, the design to ensure that the module is not receiving the state. So the user in the RS-485 network design or application, according to the actual situation to decide whether to add 120Ω termination resistor. Principle of use: Regardless of whether the RS-485 network is static or dynamic, it is necessary to ensure that the differential voltage of A / B line is not between -200mV and -10mV. Otherwise, the data communication error will occur.

Dimensions and Recommended Layout

Notes:

1. Packing information please refer to Product Packing Information which can be downloaded from www.mornsun-power.com. Packing bag number: 58040012;
2. Unless otherwise specified, data in this datasheet should be tested under the conditions of $T_a=25^{\circ}\text{C}$, humidity<75% when inputting nominal voltage and outputting rated load;
3. All index testing methods in this datasheet are based on our Company's corporate standards;
4. The performance indexes of the product models listed in this datasheet are as above, but some indexes of non-standard model products will exceed the above-mentioned requirements, and please directly contact our technician for specific information;
5. We can provide product customization service;
6. Products are related to laws and regulations: see "Features" and "EMC".
7. Our products shall be classified according to ISO14001 and related environmental laws and regulations, and shall be handled by qualified units
