

Integrated Isolated CAN ACDC power supply **MORNSUN**[®]

TLAxx-03KCAN Series

3W, Integrated isolated CAN ACDC power supply

RoHS

FEATURES

- Wide input voltage range: 85-305VAC/100-430VDC
- AC & DC (same terminal input voltage)
- Isolation voltage: 4000VAC
- Output short circuit, over-current protection
- High baud rate up to 1Mkbps
- The bus is able to support 110 nodes at maximum
- Open frame, Compact size, High power density
- Flexible design of peripheral circuit reduces layout problems
- EN60950 approval, meets UL60950 standard

TLAxx-03KCAN series for the integration of CAN 3W AC DC power supply, the product can be directly connected to the mains AC220V power supply. The output power of the main channel DC power supply is 2.5W, the auxiliary DC power output is used for bus communication. The input AC power source and the two output DC power supply have high isolation voltage of 4000VAC, and the two outputs DC power supply isolation voltage between 1500VDC. Widely used in industrial and electrical instrumentation and other demanding on the volume, wide input voltage requirements, the use of isolation bus, the need to meet UL / CE certification and EMC requirements are not high occasions. This series of products used in electromagnetic compatibility more harsh environment must refer to the recommended circuit.

Product Characteristic Curve

Note: ①The products should have input voltage derating based on temperature derating when it is 85 - 100VAC/277 - 305VAC/100 - 130VDC/400 - 430VDC voltage input;

②This product is suitable for use in natural air cooling environments, if in a closed environment, please contact our company's FAE.

2. This model is open plate, in order to meet the safety requirements of the module primary and secondary external components between the need to maintain a safe distance of at least 6.4mm;
3. Unless otherwise specified, parameters in this datasheet were measured under the conditions of $T_a=25^{\circ}\text{C}$, humidity<75% with nominal input voltage (115V and 230V)and rated output load;
4. In order to improve the efficiency of conversion at light load, the module may have audio noise, but does not affect product performance and reliability;
5. After the module is assembled, it needs to be fixed
6. All index testing methods in this datasheet are based on our Company's corporate standards;
7. We can provide product customization service;
8. Products are related to laws and regulations: see "Features" and "EMC".
9. Our products shall be classified according to ISO14001 and related environmental laws and regulations, and shall be handled by qualified units
